As of September 2026

Responsible Sourcing of Minerals / Conflict Minerals

Dear Sir or Madam,

Responsible sourcing of raw materials and compliance with relevant due diligence obligations within the supply chain are of the utmost importance to Gusstechnik Schopfheim GmbH & Co. KG.

Particular attention is paid to minerals whose extraction and trade in conflict-affected and high-risk areas may contribute to the financing of armed groups or be associated with human rights violations.

Tin, Tantalum, Tungsten, and Gold (3TG)

In the United States, Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act establishes specific reporting and disclosure requirements regarding the so-called conflict minerals—tin, tantalum, tungsten, and gold (3TG).

Furthermore, in the European Union, Regulation (EU) 2017/821 establishes due diligence requirements in the supply chain for certain Union importers of tin, tantalum, tungsten, their ores, and gold from conflict-affected and high-risk areas.

Gusstechnik Schopfheim GmbH & Co. KG supports the goals of responsible raw material sourcing. As part of our supply chain management, we require our relevant suppliers to provide information on the origin of the raw materials used and on responsible sourcing.

For the standardized collection of information within the supply chain, the **Conflict Minerals Reporting Template (CMRT)** provided by the Responsible Minerals Initiative (RMI) for tin, tantalum, tungsten, and gold (3TG) can be used in particular.

Other Relevant Minerals

In addition to the traditional 3TG minerals, other raw materials are also becoming increasingly important from the perspective of responsible sourcing.

These include, in particular, cobalt, copper, natural graphite, lithium, natural mica, and nickel. The Responsible Minerals Initiative provides the **Extended Minerals Reporting Template (EMRT)** for the standardized reporting of relevant supply chain information.

We incorporate relevant information from our suppliers into our supply chain assessment and are committed to appropriately addressing risks associated with the origin and extraction of the raw materials we use.

Should we become aware of specific risks in our supply chain, we will assess them and take the necessary measures in accordance with applicable legal requirements and our internal guidelines.

If you have any questions regarding the responsible sourcing of minerals or specific information about products we supply, please do not hesitate to contact us.

Sincerely,
Gusstechnik Schopfheim GmbH & Co. KG
